

## Milk Pap Corn with Fruits

### Preparation

Choose amount of water and pap powder depending on age and appetite according to dosage table.

Boil fresh drinking water and leave it to cool down to about 50 °C.

Put the recommended amount of powder (according to table) into a pap dish.

Measure boiled water (according to table), add to powder and stir.

Let it swell until it reaches the required consistency. Check temperature.

### The special HiPP ingredients

**Per 100 g powder:** 38 % Follow-on milk (skimmed milk powder, whey powder partially demineralised, vegetable oils (sunflower oil, rapeseed oil, coconut oil), vitamin C, iron sulphate, zinc sulphate, vitamin E, niacin, pantothenic acid, vitamin B<sub>1</sub>, vitamin A, vitamin B<sub>6</sub>, vitamin B<sub>12</sub>, potassium iodate, folic acid, copper sulphate, vitamin K, sodium selenate, vitamin D, biotin), 32 % corn flour, dextrose, whey powder (partially demineralised), 4 % fruit powder (banana, apple, prune), prebiotic dietary fibres (galactooligosaccharides from lactose), skimmed milk powder, corn starch, calcium carbonate, apple extract, vitamin B<sub>1</sub>, vitamin A, vitamin D.

### Important information

- For the sake of your baby's health it is important to adhere to the instructions for preparation and the quantities indicated.
- Always feed your baby the milk pap using a spoon and prepare it freshly for each meal.
- Seal opened sachet well after using, store at room temperature in a dry and hygienic manner – use up content within 3-4 weeks.
- Please do not warm up the pap in the microwave (danger of scalding!).
- Ensure regular dental care at bedtime from your baby's first tooth onward and do not feed your baby afterwards.

Please pay attention to your baby's balanced diet and healthy way of living.

### Prebiotic dietary fibres (GOS\*)

- ✓ *Prebiotic dietary fibres (GOS\*) can also be found in breast milk and support baby's healthy intestinal flora.*
- ✓ *HiPP milk paps Praebiotik\* are ideal in combination with HiPP Combiotic\* milk formulae.*

*Ausdrück Stoff HiPP*

\*Galactooligosaccharides – derived from lactose

### The proper dosage

Every baby is different, so daily portions of pap may vary greatly. Our dosage table is intended to help you preparing different amounts of milk pap correctly.

	Powder (g)	Water (ml)	Portion (g)
from the 6 <sup>th</sup> month	45 (approx. 4 table spoons)	135	180
from the 8 <sup>th</sup> month	50 (4-5 table spoons)	150	200
for a smaller portion	40 (3-4 table spoons)	120	160

### Use

This milk pap is an ideal meal for children being fed weaning food and is suitable from the 6<sup>th</sup> month to complement breastfeeding or infant formulae fed from a bottle. If you want to switch over to using follow-on milk for bottle meals before your baby is six months old, please consult with your paediatrician.

### From idea to conviction

Years of experience and scientific progress serve to guarantee the very high quality of HiPP milk paps. Our nutritional experts constantly face the challenge of keeping the milk paps from HiPP up to the latest technical standard. And all of this we do gladly for the natural and healthy development of your baby.

- Extensive raw material checks
- Constant monitoring during production
- Stringent control of toxic substances
- Without any genetically modified ingredients
